Benton County Nursery's Seeds Are TOP QUALITY!

"Pride of the Ozarks"

OUR ONE OBJECTIVE: BETTER NURSERY STOCKS, VEGETABLE AND FLOWER SEEDS FOR SATISFIED CUSTOMERS

TOMATOES

OXHEART

(86 Days). One of the largest tomatoes ever produced, some fruits weighing 2 lbs. each. The skin is purplish scarlet, smooth, and evenly colored. The oxheart shape of the fruits is most distinct, and they are extremely solid, having few seed cells, which accounts for their enormous weight. It is primarily a home garden variety, but readily salable on local markets and roadside stands. A quality sweet-flavored tomato. Pkt. 20c; 3 Pkts. 50c; 1 oz. \$1.50

EARLIANA

(94 Days). Hardy and productive, coming into fruit in the shortest time and rapidly maturing the entire crop of fine fruit. Fruits are globe shaped, somewhat flattened, deep scarlet and

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

Rutgers—The Ideal Tomato

A commercial variety of great importance in most of the Eastern and Southern states. It is suitable for canning, juicing, and for long distance shipping. Large fruit size, 61/2 to 71/2 ozs., makes it favored over many other popular tomatoes. Globular in shape, slightly flattened, smooth, bright red, and with heavy walls and small cells. Vine is vigorous, heavy and wilt-resistant to a high degree. It is particularly adapted to light soils and is grown on a large scale in New Jersey and

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

BREAK O'DAY

(63 Days). Outstanding for its maturity, smooth, uniform, globe-shaped fruits, and resistance to wilt. Plants are large, producing an abundance of medium sized, bright red fruit with thick walls, small seed cavities, and splendid flavor. Best adapted to rich, heavy soils. For home and market.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

MARGLOBE

(114 Days). A leading variety among canners, shippers and market gardeners. The vine is vigorous, resistant to disease, fruit a large, slightly flattened globe of fine bright scarlet color, very firm and meaty and of the very best quality. Fruits weigh 7 to 9 oz.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 60c

NEW TREE TOMATO

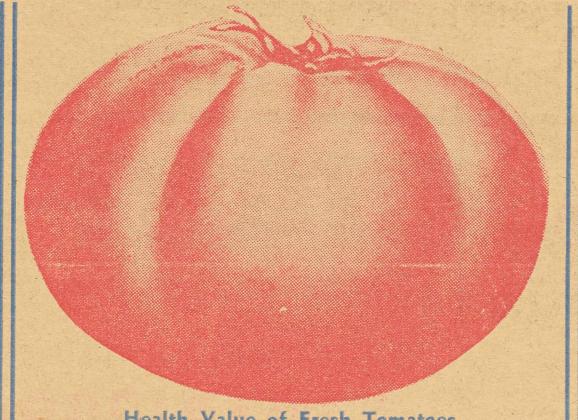

A wonderful variety that grows upright better than any we have ever seen. Tomato firm, solid, thick flesh, large meaty centers. Fruit is purplish pink. Form always round and symmetrical and of medium size. Very productive.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 80c

Wonder Bush Cherry

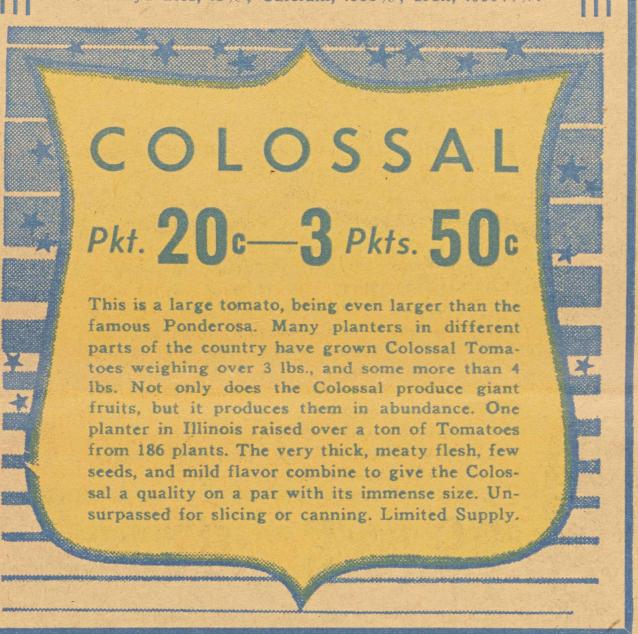

These bushes grow about 18 inches high and bear heavy crops of the best flavored fruit you ever tasted. Although many use the fruit raw, all claim it makes better pie than tree cherries. The Wonder Cherry, sometimes called Ground Cherry, will bear eight weeks after planting the seed.

Pkt. 10c; 3 Pkts. 25c

PLANT SWISS CHARD FOR GREENS

GIANT LUCULLUS. (58 Days). The rich green, fleshy, heavily crumpled leaves of this variety make very tasty "greens." The erect plants attain a height of 2 to 2½ feet. Largely sought after by those who prefer the thick, creamy white stems or stalks which are edible and tender, and may be served as a separate dish like asparagus. The leafy part can be cooked like spinach or turnip-greens, or if desired, the whole leaf can be boiled and served as "greens." There is a delicious, delicate flavor not found in either Pkt. 10c; 3 Pkts. 25c turnips or kale..

California Wonder

(122 Days). The best large fruited pepper, very smooth, color deep. Meat thick, tender, and of finest flavor. It is fast replacing other varieties. Peppers are about 5 inches in length and 4 in width, being blocky in shape. Rich and glossy

Pkt. 10c; 3 Pkts. 25c; 1 oz. 75c

Cayenne

(120 Days). A very strong variety; fruit is long (about 5 in.) and slender, bright red when ripe. Pkt. 10c; 3 Pkts. 25c; 1 oz. 60c

Perfection Pimento

(125 Days). The best of the medium sized smooth sweet peppers, largely used by canners, and excellent for stuffing. Peppers smooth, heart shaped, about 3 in. long.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

Jumbo Pumpkin

Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. A good pie Pumpkin, splendid keeper and valuable for feeding pur-

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

Sweet Potato Pumpkin

Tennessee Sweet Potato is an excellent sort which, when cooked, resembles a sweet potato in flavor, but is of more delicious taste. It is pearshaped and slightly ribbed. The color is creamy white, sometimes striped with green. Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

Sugar or New England Pie Pumpkin

Earliest and best for pies. Fruit commonly 6 in. long and 8-9 in. in diameter. Flesh thick, orange yellow, of unexcelled quality. Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

CUSHAW-White, 115 Days Similar to green striped except better for storage.

Fine for pies. Exceedingly prolific. Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

PRODUCING Poultry Grain

EDS FOR POULTRYMEN

CABBAGE

Is a wonderful green food for poultry and has been known to yield 3 tons in a space 40 by 60 feet. You can't beat this for low priced feed. One-half pound of seed will grow enough greens to feed about 1.000 hens for four months; 3 pounds to an acre for 6,000 hens for four months. Poultry Cabbage is a rapid grower. In the Northern States the seed may be sown any time from early spring until the middle of July. In the South, seed may be sown throughout the entire

Pkt. 10c; 3 Pkts. 25c; 1 oz. 50c

feet high, and just loaded with leaves.

(80 Days). Jersey or thousand headed. Immensely productive sort much grown for chicken feed. Ideal for Stock. Plants tall, sometimes attain height of 6 ft. or more. Much branched and tree like and bears an abundance of thick smooth deep green leaves.

Pkt. 15c; 1/4 lb. 60c; 1 lb. \$2.00

MAMMOTH RUSSIAN SUNFLOWER

Chisha, or Chicken Lettuce

You have, no doubt, read in the poultry journals that

lettuce is an excellent feed for chickens. In the Chisha

Lettuce you will find a feed that yields as much or more than other green feeds. It is economical to grow this strain, for when cut it resumes its growth rapidly

and can be cut again and again; or the leaves can be pulled off each stem like the Jersey Kale. The yield

is extremely heavy. Chisha, or Chicken Lettuce, does not make a head, but sends up a stout stalk, 3 to 4

Pkt. 10c; 3 Pkts. 25c; 4 lb. 65c

Sunflower seed is an excellent poultry feed at all times and especially during the molting season. Single heads often measure 12 to 22 inches in diameter and contain an immense quantity of seed.

Pkt. 10c; \(\frac{1}{4}\) lb. 35c; 1 lb. 60c

POULTRY BEET-MANGEL WURTZEL

KALE or BORECOLE Furnishes a tremendous yield per acre and makes an excellent green feed for poultry during the winter months and always increases egg production. Mangel Wurtzels are excellent food for cattle and keep them in perfect physical condition and increase the flow of milk. Only a little garde space will be required for growing, enough to last all winter, and they are very productive. Stored in cellar or any cool place, they will keep until spring.

Here is a new Poultry Grain that owes its origin to Russia, that enables you to raise your own feed. If you only have a small plot of ground, you can make an enormous crop. Proso is unlike anything you have ever seen in this country. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet, stools and branches making fifteen to twenty-five heads instead of one. That is why it yields such enormous crops from such unbelievably small plots of ground.

Wonder Egg and Meat Producer for Chickens, Ducks and Geese

Proso makes a splendid mash when ground alone. When feeding with corn or oats the ration should be four parts Proso to one other grain. It may be fed in bundles as the kernels are readily scratched out of the heads, or it may be fed as clean grain from the thresher. Produces more eggs and meat per bushel than ordinary

Fine for Hogs, Cattle, Sheep. Grows Anywhere. May Be Planted Late. Although a native of Russia, Proso does

better, grows faster and matures quicker in our climate. During the fifteen years since it was first introduced into this country it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

7-oz. pkg. 45c — $2\frac{1}{2}$ lbs. \$1.20 — 5 lbs. (1 acre sowed in drills) \$2.00 - 121/2 lbs. (1 acre broadcast) \$4.00 - 25 lbs. \$7.00

SNAKE CUCUMBER. Can be sliced. Grows crooked and resembles a serpent. Try a few. Pkt. 10c; 3 Pkts. 25c

BOSTON PICKLING—(60 Days). An early pickling or slicing variety. Fruits weigh about 1½ lbs., 6 in. long and 2½ Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

STAYGREEN-(60 Days). Our strain is the improved long type and is one of the most productive and popular cucum-bers in use today. For years it has been a leading shipper and is commonly used in the home and market gardens.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c IMPROVED LONG GREEN-(70 Days). One of the best for all purposes—fruits Tong and slender, seed cavity small. Fruits weigh $2\frac{1}{2}$ lbs., are 12 to 15 in. long and $2\frac{1}{2}$ in. in

Pkt 10c; 3 Pkts. 25c; 1/4 lb. 65c

WEST INDIA GHERKINS

stronger grower than most cucumbers, grows anywhere and is practically bug and disease proof. Price: Pkt. 10c; 3 Pkts. 25c

Cucumber Colorado (60 days)

New. Of truly wonderful qualities and as near perfection that the originator calls it "the ultimate in a cucumber." Fruit 9 in. or more in length, slim, only 21/4 in. in diameter, very straight, very dark green, full at the ends and stays green longer than most sorts. Heavily productive and extra early. At present it is the finest slicing cucumber in existence but is not adapted for pickling as the fruit is too slender when

Pkt. 10c; 3 Pkts. 25c

STRAIGHT EIGHT-FINE SLICER

(66 Days). A big vigorous grower, cylindrical in shape, uniform round, dark green over the entire surface, small seed cavity, thick flesh of fine quality and very attractive.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

Garden Huckleberry

The Garden Huckleberry produces from seed the first year. A new fruit that cannot be excelled for pies and preserves. Very prolific, yielding an immense crop of fruit. It is an annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil The fruits grow larger than the common Huckle-berry or Blueberry. If cooked with apples, lemons, or anything sour, they make the finest jelly. You will be delighted and astonished with this easily

growing, wonderful novelty.
Pkt. 10c; 3 Pkts. 25c

DILL PICKLES

Cover bottom of crock with dill stalks, fill with whole cucumbers. Add brine to cover Use 1 cup of salt to a gallon of water. Add more dill stalks, weight down so cucumbers are covered. Ready to use in 6 weeks

VEGETABLE OYSTER

Rapidly gaining popularity because Fried, stewed, or used for soups Salsify is a real delicacy. Come along in late summer and fall. Some should be dug and stored for winter use, some left for early spring. Culture same as parsnips. MAMMOTH SANDWICH ISLAND SALSIFY. Tender, delicious, smooth, beautiful white roots

Pkt. 10c; 1 oz. 30c

VEGETABLE OYSTER STEW

Scrape and slice your Salsify, salt and pepper as desired. Boil until tender. Drain, then add rich milk and serve hot. Do not allow milk to boil. Cooked this way, it tastes very much like Oyster stew.

LOOSE LEAVED VARIETIES

BLACK SEEDED SIMPSON-A favorite among the loose Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c EARLY CURLED SIMPSON-The best of early varieties of the loose leaved kinds; leaves light green, crisp and fine

Pkt. 10c; 3 Pkts 25c; 1/4 lb. 75c

(60 Days). A little oval shaped prickly pickle which is said to have come from the West Indies. Very prolific bearer, a proved type, early and sure heading. Is of fine appearance, excellent quality and has a large percentage of perfect heads. Pkt. 10c; 3 Pkts. 25c; 1/4 lb. \$1.00

> BIG BOSTON-A variety highly recommended for home gardeners. Sure header medium size, outer leaves attractive green color tinged with brown. Heads are a crisp, fine buttery flavor. Be sure to plant this variety in your home garden. Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 85c

Mustard

SOUTHERN CURLED-Leaves large light

green, finely curled, and have a mild agree-

able flavor. It also makes a fine greens for

HEAD LETTUCE

(110 days) White Sweet Spanish Large, mild and sweet. Pure White. A much better keeper than the Bermudas.

ONIONS ARE HEALTHY

EBENEZER, The Extra Early,

Long Keeping, Mild Onion

Calcium .034%

One of the mildest flavored onions grown. The flesh is

white, firm and of a very delicate flavor. The onions are

quite similar to Yellow Globe Danvers in shape but much

larger in size, yellow skinned and have very small tops and

mature early. Many people who know this onion will have

has been grown, the onions of this variety command much

higher prices than other kinds. Those who want a nice mild

onion, either for large onions or bottom sets, would do well

to try the Ebenezer. Sets are grown the same as large onions,

except that the seed is sown thickly—one pound of seed to

each 100 feet of drill. These sets, if planted early in the

spring, will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce

seed stalks as other kinds do. The Ebenezer is such a good

keeper that even those ripening in July will keep sound and

hard through the fall and all winter. Don't fail to plant

Pkt. 15c; 2 Pkts. 25c

no other kind for their own table. In the localities where it

YELLOW SWEET SPANISH (110 Days). Pkt. 15c; 2 Pkts. 25c

Try This New American **Drought-Proof Pea**

Laughs at Drought. Smiles at Rain. For midsummer planting this is the variety to plant If rains and the soil is kept moist, this variety will produce as large a crop as any variety we know of. If it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the pea that will do its best in the North, South, East or West. Don'a fail to try it.

(60 Days). Always comes into bearing ahead of the other wrinkled ones. Very dwarf, medium size pods of good quality, unusually productive.

THE DROUGHT

RESISTER

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 21/2 lbs. \$1.00

ALASKA or Earliest of All (60 Days). Standard, popular. Extra-early smoothseeded pea for market and canning. Vines 21/2 ft. tall; light green. Well-filled, mediumsized pods completely packed with small round green peas, which mature practically all at one time. The pods are plump and round, light green, blunt. The mainstay of the grower who wants a variety that can be cropped in one picking.

Pkt. 10c; 7 oz. 25c; 14 oz. 40c; 21/2 lbs. 90c

THOMAS LAXTON (57 Days). This has no superior as an early Pea of medium height. The veins are strong, with large dark green foliage, and grow 21/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 41/2 inches long. These are well filled with large, tender Peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home-garden and shipping.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 21/2 lbs. \$1.00

LITTLE MARVEL Tender, Heavy Yielder (62 Days). It will be a long time 'til we find a better one than this. For quality, yield, earliness, or any other point, it's hard to beat. A vigorous grower and a heavy yielder. Three quarts of pods will often shell out a quart of peas. Tender and sweet, and of finest quality.

DETROIT DARK RED

(59 Days). An early maturing beet of remarkable uniformity. Splendid for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 21/2 to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. \$1.00

CHANTENAY-LONG TYPE

(70 Days). A new strain of Chantenay bred to meet the recent popular market demand for longer Carrots. Roots deep orange, smooth, tapered, stump-rooted. The strong,

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

DANVERS HALF LONG

(75 Days). A prime favorite because of its brilliant market appearance. The smooth, handsome roots are $6\frac{1}{2}$ to $7\frac{1}{2}$ inches long, tapering uniformly to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, thus always selling at top market prices. Our strain is outstanding.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

NEW CORELESS CARROT

flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or

INOCULATE . . . for a Bigger Yield

Inoculation often increases yields up to 20%. Encourages faster growth and makes vines much larger and healthier. It only takes a jiffy to inoculate. Nitragin is a humus in moist, powdered form. Full of Legume Bacteria which assures faster, thriftier growth and larger yields. Also enriches the soil at the same time. A 10c size packet of Nitragin inoculates 2 to 4 lbs. of peas or beans. We certainly recommend this inoculation of your seed. Order Nitragin now. We will send it right along with the seed.

HALE'S BEST Most Popular Market Sort

(80 Days). Medium size, very early sort, slightly oblong, but well netted and very attractive. Thick flesh, deep orange color, extensively planted in the commercial muskmelon growing districts.

> HEARTS OF GOLD The Sweet Table Melon

(95 Days). The name about describes it. Medium size, round, well netted, sweet and tender.

(96 Days). (Salmon Flesh). A large size, main-crop melon, varying in shape from round to slightly oblong. The pale green skin is distinctly ribbed and lightly netted. Flesh is a beautiful deep salmon, sweet, spicy, and full of rich aroma. Popular with home gardeners and, in some sections, a leader with market growers.

HONEY DEW

(110 Days). (Green Flesh). The well-known greenthe north and east. Smooth, ivory colored skin; rich, should be grown in every garden. emerald-green very sweet flesh.

HONEY OR SUGAR ROCK

(85 Days). An early variety increasing in popularity among market gardeners and shippers. Fruits—5-6-in. in diameter, round to slightly flattened, coarsely net-

All varieties, pkt. 10c—3 pkts. 25c

Celeriac or Turnip Rooted Celery (120 Days). Grown exclusively for its roots, which are fine for soups and stews or cooked and sliced as a salad. The roots keep all winter if packed in damp sand or put into kilns like beets, carrots and turnips. Plant and cultivate like celery except it does not re-

BROCCOLI (55 Days). Delicate cauliflower flavor, branching, Pkt. 10c; 1/4 oz. 25c

WATERMELONS

Stone Mountain. (88 Days). Also known as Dixie Belle. A popular round watermelon with grayish green smooth skin and beauful deep crimson flesh without any white in the heart or stringiness. The average melon weighs about 45 lbs. each. It has a thin rind and is fine for home use and local markets where a nearly round melon is desired.

Winter Watermelon. A home-grown melon for your Thanksgiving dinner. It is not a citron or a freak, but a very prolific, long-keeping true watermelon. Flesh red, extremely firm, very brittle and deliciously sweet. Fruits taken rfom the field before killing frosts and stored in a cool place will keep long into the late fall and early winter and retain their delicious sweetness and flavor.

Tom Watson. (95 Days). A very large melon weighing 35 to 40 pounds. An excellent shipper. Skin is light green with darker green veins. The flesh is deliciously sweet and juicy.

Kleckley's Sweet or Monte Cristo. One of the earliest, best and sweetest-flavored melons in cultivation. On account of its thin rind, it will not stand shipment to distant markets, but it is the best that can be grown for the home and nearby markets. The skin is dark green. It is of symmetrical oblong shape, well rounded on both ends. The flesh is scarlet,

Peerless. (85 Days). Highest quality melon for home and market. Flesh bright scarlet. Sweet meat. Sometimes called Ice Cream.

firm, solid and of delightful flavor.

Dixie Queen. (85 Days). An excellent shipper. Ideal size—30-lb. average. Round thin rind, delicious flavor. Seeds small and

California Honey. (77 Days). (New ice box size). Fruit 8"x10"—deep green. Delicious sweet flavor.

All above varieties......Pkt. 10c 3 Pkts. 25c; 1 lb. 75c

PRIDE-OF-THE-OZARKS-SEEDS

ONE OF THE MOST DELICIOUS OF ALL VEGETABLES The New Guinea Butter Vine is a wonderful vegetable. Grows to enormous size, one fruit often weighing 15 lbs. and from 3 to 5 feet long. In growth it is similar to the squash, and can be grown in the same manner or can be trellised up. It is more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and stand more neglect and abuse than any other vegetable vine we know of. The fruits should be eaten when small, while the fuzzy growth is yet on. It can be cooked like Squash and fried like Egg Plant. When cut up in small pieces and cooked with cream, or fried, it is most delicious. If trellised up, the vines take up so little space, no garden is too small for at least Pkt. 10c; 3 Pkts. 25c New high yielding summer squash. Plants strictly bush and compact. Quality unsurpassed.

Inoculate your bean seed with Nitragin. The beans will be larger and better. GARDEN SIZE ENOUGH FOR 6 POUNDS...

VEGETABLE

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each

plant produces from six to ten beautiful bright yellow, oblong fruits about 8 to 10 inches long. Each fruit is filled with a delicious spaghettilike pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut in half. A dishful of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot. This remarkable vegetable fleshed melon for warm climates; will not do well in is one of the most valuable and useful of recent introductions, and

ANOTHER BRAND NEW PEACH-The Arkanas Black is the earliest peach known in this ction. It ripens before the Mavflower: it is tiful color we have yet seen for a peach. They are a very dark red getting almost black; cling-stone and of good quality. They have a good color for several days before they are ripe, and from the time they are ripe the fine appearance they have and good quality make them sell like

The largest peach we have ever known. The giant of the peach family. This peach originated in Madison County. Ark., and always took first prize when put on exhibition at fairs and fruit shows. The peach is yellow, overlaid with carmine. The texture is fine-grained and firm; the flavor is very pleasant, rich and juicy, which makes it one of the very best in quality. Ripens about 20 days after Elberta. Only a few trees for the market this season. Cling. Same price as the New Improved Varieties.

Plant the New BOYSENBERRY for Handsome Profits!

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing blackberries, raspberries and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and soft seeds The plant is very vigorous and hardy, coming through in good condition, without in-jury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and Ea. 12c; 10 \$1.20; 100 \$8; 1,000 \$60

THORNLESS BOYSENBERRIES 20c ea.; \$2.00 doz.; \$15.00 per 100

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to

nandie; it is very attractive, ships well, keeps well and cans well. It has so many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry

Youngberries are universally liked and easily grown. They are among the largest berries, of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberry bushes than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

FOOD PRODUCTION STILL REMAINS A PARAMOUNT PROBLEM BE-CAUSE MILLIONS OF HUNGRY PEOPLE MUST BE FED!

Grow Plenty of

RAISE VEGETABLES

WHITE VELVET

Scarlet Turnip White-Tipped

25 days. This Radish is a table delicacy, crisp, tender and sweet. A very deep scarlet with a distinct snow-white tip covering about one-third of the lower part. Medium in size, nearly round, with tap-root. We offer a highclass, refined strain.

White Icicle 27 days. Clear white roots which

grow to a length of 6 inches, slender and tapering at the tip, brittle as ice and of mild, inviting flavor. A fine variety for both market and home gardeners who want an early, long white Radish. All Varieties

1 lb. 50c

COFFEE - One Cent Per Pound

Grow your own coffee at an expense of less than one cent per pound. The

Grow your own coffee at an expense of less than one cent per pound. The Domestic Coffee Berry makes a delicious, nourishing drink, to take the place of injurious coffee. It is a pure food drink that gives health and strength to young and old. The best coffee substitute ever discovered, and thousands pronounce it as good or better than the best coffee. It has the rich, deep brown color of old Java. One of the easiest grown and most productive of all plants. It is an early variety of soy beans; can be successfully grown in any climate, and is sure to ripen even in the extreme North. As easily grown as corn or beans, and does well on all soils. Thousands suffer untold injury from store coffee. Better grow some of the domestic Coffee Berry this year and save your health and money. Prepared like any other Coffee. Full directions with every packet.

GIRASOL The Lazy Man's Spud

Choice Seed Tubers: 6 for 40c; 12 for 70c; 25 for \$1.25;

50 for \$2.25; 100 for \$4.00

All stock and poultry like Girasol tubers, but perhaps the most profitable use would be as hog teed, the hogs doing their own harvesting with no expense. Trials along this line have yielded 744 pounds pork gain per acre; this might be considered NET PROFIT. The silage crop would be more than enough to cover cost of seed, land rental and cultivation expenses. Adding grain to balance the ratio would of course help. Every farm should have from one-fourth to one acre of Girasol so that they could turn the hogs on it in the fall. It's a big money-maker for hogs. Girasol may be eaten raw or cooked, but the inulin in Girasol that replaces starch in most other vegetables need not be cooked to bring out its food value. This crop will grow on most any wind of soil but the richer the better of course, but it will do better on poor soil than most any other crop. Single tubers often weigh more than a mound but the average is smaller and more irreg-

other crop. Single tubers often weigh more than a pound but the average is smaller and more irregular shape than potatoes. Small tubers, or large ones cut small, do not seem to decrease the crop

WONDERFUL HOG FOOD

If someone were to discover a plant "Sport" or if some plant breeder could cross sunflowers or corn with potatoes to get a plant, the tops of which would make silage and, at the same time, produce valuable tubers that would outyield potatoes two or three to one, under similar soil and moisture conditions, we would hail the result as a wonderful discovery. Girasol will do all this and more and

conditions, we would hail the result as a wonderful discovery. Girasol will do all this and more and yet, it is not NEW for it has been raised in Europe for centuries under another name. France alone produced 1,686,030 long tons in 1928 so our Consul at Paris wrote We call this crop Girasol because the name under which it sometimes passes is the same as another vegetable entirely different which is confusing. The scientific name is Helianthus Tuberosus; it is related to both artichokes and sunflowers; it is a native of America, not Jerusalem or elsewhere. Girasol tuber will outyield potatoes two or three to one under similar conditions. Yields of 10 to 20 tons per acre are common. Girasol tops are about a third or a half the diameter of sunflower stalks, but usually two or three feet taller and yield 10 to 22 tons silage per acre. Girasol is not injured by freezing. The whole or a part of the crop of tubers may be harvested in the Fall or the Spring following. Girasol is propagated by tubers only, not from roots and joints like quack grass and thistles so it cannot become a serious pest if followed with pasture, hav meadow or good cultivated crops.

et if followed with pasture, hay meadow or good cultivated crops.

DWARF LONG GREEN POD

A variety of Poinsettia which grows quickly to a height of $2\frac{1}{2}$ to 3 feet from seed sown in the open during May. About the middle Early and very prolific. Grows 21/2 to 3 ft. tall; pods dark green, fleshy and tender; become of summer, the top central leaves turn to to 8 inches long and 11/8 inches in diameter; rich orange-scarlet, similar to the famous greenhouse variety of Poinsettia which is so Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 50c popular about Christmas time. A blaze of

A HOBBY THAT PAYS... GARDENING... HAVE GORGEOUS BLOOMING FLOWERS and a BEAUTIFUL LAWN

CACTUS SEEDS

Cactus make most interesting house plants, extremely odd and curious, and many have

generous and beautiful blossoms, sweet scented, and blooming profusely. These oddest

of all plants grow in many shapes and sizes, are easily grown, thrive and bloom with

very little care, and endure the heat and dryness of the ordinary living room. Much pleasure may be derived from growing them from seed. Everyone is delighted and surprised at the odd appearance of a Cactus just sprouting. If you desire a fine col-

lection of rare varieties, sow the seed in pots or boxes in a warm room in moist stand, and the seed will grow quickly. We have fresh seed of a mixture of choice varieties.

Pkt. 10c; 3 Pkts. 25c

Printed in seven different colors. The revolving chart points to A-B-C-D-E-F-G, which denotes the various degrees of acidity, alkalinity or neutrality of the soil. By turning to A which is highly acid you are told which flowers or vegetables will thrive in this soil.

The small bottle contains a sufficient supply of Alkemi Soil Testers to make at least 50 tests. This bottle is permanently attached to the chart. To remove the testers, you remove the cord and replace it to keep the testers handy.

Reverse side of Chart contains Soil Indicator listing more common vegetables and flowers and beside each are certain key letters which denote \$100 the type of soil each is apt to thrive in......

DOGZOFF

This is guaranteed to keep dogs and other animals away from places they are not wanted. Harmless to humans, non-poisonous. non-inflammable. Easy to use, simple instructions on every bottle. One bottle usually lasts a season.

By Llewellyn George Well Known Author and Lecturer

The Moon Sign Book gives complete

instructions in the use of planetary in-

fluence on planting and harvesting, also

business and personal affairs, etc., the

result of more than thirty-five years of

research. Why do farmers plant Potatoes

in the dark of the moon? When should

Corn, Beans, etc., be planted? Why flor-

ists plant seeds in the 2nd quarter and a

certain Moon Sign? Why you should

plant flowers in Libra on a certain date

and Moon's phase? These and many other

questions are answered and explained in

a simplified yet scientific and practical

manner. The Moon Sign Book has been

published annually for over 37 years with sales increasing each year. A mine of useful information. Price, \$1.00 in the U. S.

USED AS A CONTROL FOR

WE CANNOT ACCEPT NURSERY ORDERS FOR LESS THAN \$1.00. Because of the heavy expense of packing and high rates on first pound by parcel post and express we cannot fill orders for less than \$1.00, without loss to us, and will ask you to make your orders amount to \$1.00 and up.

C. O. D. ORDERS MUST HAVE A DEPOSIT PAID ON THEM. We are sorry that experience has taught us that it is a losing proposition to fill orders and make shipments unless a deposit has been paid on the order; our stock is perishable and must have prompt attention when it arrives at destination and we are compelled to ask a deposit of 25 per cent of the amount of the order as a guarantee of good faith. We guarantee satisfaction or your money refunded.

OUR CREDIT PLAN, NO PAYMENT PLAN ORDER ACCEPTED AFTER MARCH 15TH On orders amounting to Ten (\$10) Dollars and up we will be glad to make the following terms to responsible people in order that you may buy and plant what Nursery Stock Seeds and Plants you will need while the season is on to plant them and pay the balance due on them after they are planted. This enables you to have the stock coming on while you are paying out the balance due. In buying on our credit plan your order must amount to \$10 or more. To each dollar your order amounts to add 6 cents. This is done to defray the extra expense of taking care of the Credit Plan orders.

One-half of the amount of the order is to be paid down with the order, or before shipment date. The balance is to be paid in three equal payments, as follows: One-third of the amount due to be paid one month (30 days) from date of shipment. Second payment of one-third of the amount due is to be paid two months (60 days) after date of shipment. The third payment of one-third the amount due is to be paid three months (90 days) after date of shipment. You may if you prefer send a deposit of 20 per cent of the amount of the order and we will ship C.O.D. for balance due on the first shipment.

We prepay transportation charges on all orders amounting to \$10 and up, except Balled or Burlapped Evergreens. Be sure to give your Post Office and Express Office if your Express Office is not same as your Post Office.

We guarantee our stock to reach you in good condition. If found otherwise return to us immediately by express or mail, and we will retund every penny paid to us and paid by you for express or postage. Weather and soil conditions and the way stock is handled after it leaves us have much to do with stock growing off and doing well, all these being beyond our control. We will replace any trees or plants sold by us this veer if reported by Turne Let after purchase.

KHUBARB (PIE PLANT)

CULTURE - Good plants are easily grown in any good soil. Plant four feet apart each way, in deep warm and very rich soil. The more manure the better stalk. For winter forcing, take up two-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark.

GIANT VICTORIA - This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright, crimson color, very tender, crisp and of mild, delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 10 to 24 inches long; broad, thick and solid; stalks will weigh on an average one-half pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money maker and in great demand. Try a dozen or two, our word for it you will never have cause to re-

gret your purchase, and you will never be without some of this 10cea., \$100 per doz.

A most unusually outstanding and delicious plant. A cross between a peach and a plum. Resembles a peach in shape, size and flavor. As fuzzless as a plum. Fruit is large, juicy and melting. Unequaled either as a fresh fruit or for canning. Flesh fine grained and a beautiful color clear to the pit. Destined to become one of America's most popular tree fruits. Has the same habit of growth and bearing as the peach, and requires the same care.

SURECROP-Red freestone underlaid with yellow. PINEAPPLE—Red freestone.

QUETTA-Red clingstone. 2-3 ft.....ea. \$1.00 3-4 ft.....ea. \$1.20 4-5 ft.....ea. \$1.40

ASPARAGUS MARTHA WASHINGTON — (Rust Proof) 1 year full

growth. 50 Plants.
Order Collection No. 6

It is as easy to grow as a weed, and every good housewife knows its great value in the making of sauces and seasoning. Once used in pickle, it will never be done without. Pronounced by the best authority to be perfectly wholesome. A dozen plants will supply a large

family for a lifetime, and it grows and multiplies very fast. 10c each \$1.00 per dozen
